

Museo 2D Family - Compare with reference code, no output*

*Maybe a firmware update is required for this function!

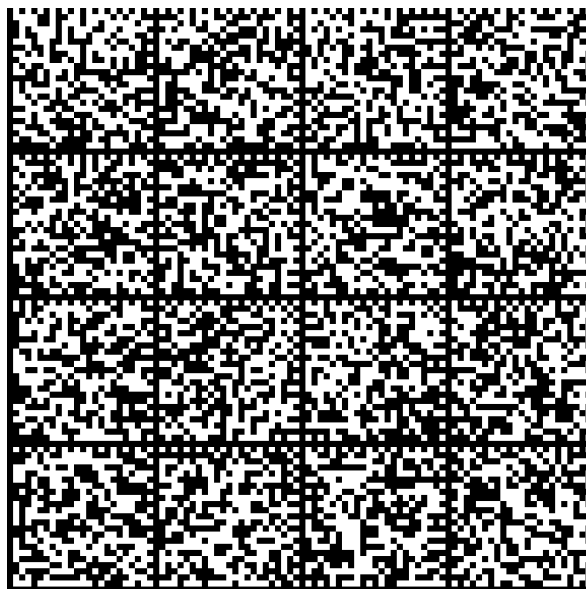

Factory Configuration

Interface (USB-KBD ALT-Mode) & Codes

This script compares barcodes using a changeable reference code.
To set a reference code, please scan the ERASEDATA barcode and then the
reference code. It is possible to disable this function for normal scanning.

Erase Data code to set a
new reference code

Enable Script

Disable Script

Terminator / Suffix Selection for normal scanning
